Key features

Clinically tested

Clinically tested

Several studies (conducted in Austria) prove the high accuracy and reliability of Microlife's infrared thermometers.

User-friendly and hygienic

Fast and easy measurement without touching the person.

- Very easy handling
- Gentle monitoring, even on a sleeping child

Blue tracking light

A blue LED light indicates the correct measurement area and the distance.

Child-friendly dolphin design

The unique dolphin design was specifically developed to make a measurement more pleasant for children.

3 in 1

Multifunctional and precise

Accurately measures surface temperature of the following:

- Milk in a baby's bottle
- Surface of a baby's bath
- Ambient temperature

Measuring range and accuracy: 0 - 100.0 °C; ±0.2 °C between 35.0 ~ 42.2 °C

36.2°C
37.6°C

Silent Glow™ Technology – Fever alarm

The colour-illuminated fever alarm:

- Green display: temperatures up to 37.4 °C
- Red display: temperatures higher than 37.4 °C

37.5°C

Illuminated display with date and time

Large illuminated display with date and time.

Sound Control (On/Off)

Silent operation especially for measurements at night.
